

## COMMUNITY NOTICE

For Immediate Release:

Tsiothóhrha/December 22, 2023

### **WATERMAIN REPAIRS COMPLETED**

The Mohawk Council of Akwesasne's Water/Wastewater Program is notifying the community that repairs have been completed for the watermain leak that had occurred underwater between St. Regis and Snye.

Water samples have tested negative for bacteria Chlorine residuals are also normal. The water from MCA's waterline is safe to drink and the system is back online connecting the two districts.

We are no longer requesting residents to limit water usage. MCA would like to thank community members for their patience and cooperation throughout the past several months while we worked to locate and repair the leak.

MCA would also like to thank our water staff, contractors, and those who assisted from the Saint Regis Mohawk Tribe and City of Cornwall, all who worked tirelessly to assist us through this emergency. Niawenhkó:wa.
